

A1+

ACOUSTIC AMPLIFIER

The new A1+ is in response to market requirements for very high quality acoustic instrument sound reproduction from a small portable package.

The A1+ achieves this by enhancing the core characteristics which made the existing model the choice of so many players.

The A1+ maintains the two completely identical but independent instrument/mic channels and separate Auxiliary input that made the original such a success – and all three can be used at the same time!

Both A1+ main channels have full EQ – Bass, Swept Mid and Treble.

The A1+ has increased headroom with an 80W power section and improved frequency response thanks to its high quality dome tweeter and 8” Bass driver.

The A1+ is fitted with an enhanced DSP, a Phantom Power option, Balanced XLR D.I. output and FX loop.

The A1+ comes complete with a footswitchable Master MUTE facility.

The A1+ is packed into a compact ‘Kickback’ cabinet with our brand new **TuffStuff** finish – an extremely tough, ultra-durable polyurethane coating – and comes with a built-in pole stand mount.

New A1+ Features:

- 80 Watts output power (with optical limiter)
- 8” Bass Driver
- 1” Dome tweeter
- Two identical channels for Instruments XLR balanced or Mono jack unbalanced+Microphones.
- Both channels can be used and blended simultaneously for multi pickup systems.
- Switchable phantom power on channel two for suitable microphones.
- Channel gain controls and peak indicators for optimum levels of low distortion and noise.
- Full EQ on each channel Bass, Swept Mid and Treble.
- Sub sonic filtering on each channel (for improved bass response)
- Overall anti-feedback control and phase reversal.
- Master mute facility on panel with remote via FS2.
- Headphone socket on fascia (mutes power stage)
- Auxiliary input on fascia panel for MP3 etc. with level control.
- Internal 16x digital FX module selectable to either or both channels via pan control.
- Integral FX has level control and mute button.
- External FX loop on rear panel to either or both channels via fascia FX pan control. (Selectable 0dB/-10dB)
- Both FX remotely mutable via FS2.
- Balanced XLR DI (Post EQ/FX) with ground lift on rear panel.
- Phantom switch on rear panel (with active LED)
- Dual voltage switching for 115/230V operation.
- Smaller cabinet size with pole stand adaptor
